ESPAÑOL

Este Videopac es uno de la serie destinada a su empleo con el Philips Videopac Computer G7000, que proporciona entretenimiento, estímulo y formación para toda la familia. Asegúrense de que el

Videopac Computer se ha colocado correctamente y pasen a la página 19.

Marksman

(1 player). Press key 0 or 1.

Key 0 gives a game lasting 1 minute.
Key 1 gives a game lasting 3 minutes.

A number of targets float across the screen past the sights of your rifle.

You can slow down or speed them up using the joystick of your handset.

You can also move the targets up and down.

Press the action button to shoot when one of the targets covers your rifle sights (the white dot of the rifle). When the blue square shows on the viewfinder you are ready to fire again.

Each hit scores as follows:

■ = 1	✕ = 4	✕ = 7
✕ = 2	✕ = 5	■ = 8
● = 3	✕ = 6	— = 9

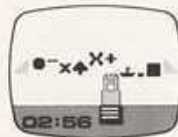

A target will disappear when you hit it.

The value of your last scoring shot is shown at the bottom right of the screen, the time remaining is shown at the bottom left. The number of shots you have left is shown on your rifle barrel; you begin with 24 shots. When your time reaches 00:00 or you have no more shots left, the game is over and your total score is shown at the bottom right.

Note: You will reach higher scores if you choose one target and aim for that each time.

Scores

below 50: more practice needed
50-70: fair
70-100: good
100-120: very good
120-140: excellent
140 and above: a marksman
When you reach 100, the targets move faster.

Targets float across screen.

Use joystick to manoeuvre targets, press action button to shoot.

A direct hit!

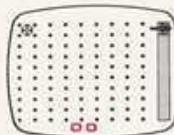

Depth Charge

(1 player). Press Key 2.

An area of water is shown on the screen. This water hides 7 submarines which you must search out and destroy. Your cannon is shown on the right of the screen, and the rangefinder is the white cross at the top left of the screen.

Use the joystick of your handset to move the rangefinder until it is over one of the grey squares (the rangefinder must be totally inside the square), and press the action button to fire. If there is a submarine there, a blue section will appear. If there are no submarines, the computer will give out a buzz.

The submarines are of different sizes, having either 1, 2, 3 or 4 sections. There are:
3 submarines of 1-section each
2 submarines of 2-sections each
1 submarine of 3-sections
1 submarine of 4-sections
When you have found them all, the computer will give out a short tune, and your score (the lower the better) will be shown at the bottom of the screen.

Search and destroy!

Use joystick to move rangefinder, press action button to fire.

A direct hit!

Each time a game is finished, press RESET (Δ). 'SELECT GAME' is shown on the screen. Now:

- Select another game.
- Select another Videopac.
Remove existing Videopac by placing one hand next to it, and pulling handle upwards.
Replace Videopac in its box.

Refer now to Instructions for Use of the next Videopac.
c) Plug aerial back into TV, and unplug the Videopac Computer from the mains.

Check procedure

If you suspect a fault in the equipment follow this procedure (with a Videopac installed). Press RESET (Δ). The TV will emit a short sound, and 'SELECT GAME' should appear on your TV screen. If not, ensure that the equipment is set up properly as detailed in the Instructions for Use (both of the

equipment, and of the Videopac used). If the fault remains, take both the equipment and Videopac to your dealer.
